

Summary of carboNZero certification:

Antipodes New Zealand Limited

Antipodes New Zealand Limited meets the requirements of carboNZero^{Cert™} certification having measured its greenhouse gas emissions in compliance with ISO 14064-1, committed to managing and reducing its emissions and neutralised the remaining unavoidable emissions through the cancellation of an appropriate number of verified carbon credits in respect of the operational activities of its organisation, excluding contracted manufacturing of products.

Introduction¹ – Ageless beauty begins here. Antipodes[®] is certified organic and natural skincare featuring premium avocado oil and exotic New Zealand plant extracts, with scientifically proven skin enhancing properties. Our offering to you is ultra-hydrating skin preparations that contain bioactive botanical ingredients, and which imbue your daily skincare rituals with aromatic blends of heavenly pure plant fragrances. Be assured by our green beauty ethos featuring full organic certification, traceability of sustainable ingredients, use of renewable resources, ecologically sound values and the lightest of carbon footprints.

Boundary – The boundary for the preparation of Antipodes New Zealand Limited's greenhouse gas (GHG) inventory is for one site. All business activities have been included.

Consolidation approach – operational control

Base year – 01/04/2009 to 31/03/2010

Measurement period – 01/04/2009 to 31/03/2010

GHG emissions source inclusions – the diagram below shows the operational GHG emissions for Antipodes New Zealand Limited by emissions source. Antipodes New Zealand Limited's total emissions for this period were 72.33 tonnes carbon dioxide equivalents (tCO₂e). The breakdown of the total emissions by Scope was:

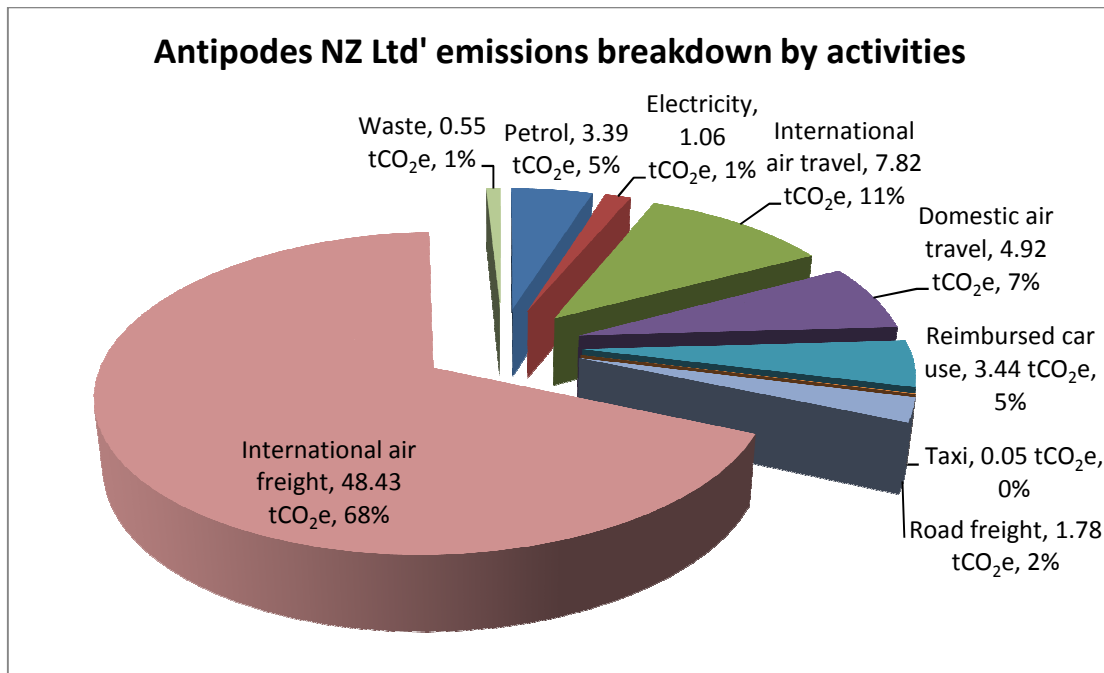

Scope 1: 3.39 tCO₂e;

Scope 2: 1.06 tCO₂e

Scope 3: 67.87 tCO₂e.

GHG emissions source exclusions – Courier activities under 2kg were excluded from this inventory as allowed within the programme's *de minimis* rule. Contract manufacturer's emissions excluded due to insufficient data. This will be recorded going forwarded and measured for next inventory. Storage of product within the warehouse was excluded, due to insufficient detail.

¹ **Disclaimer:** This Disclosure Statement is a summary of the verified information considered for certification and the certification decision. It should not be taken to represent the full submission for certification. While every effort has been made to ensure that the information in this Disclosure Statement is accurate and complete, Landcare Research does not, to the maximum extent permitted by law, give any warranty or guarantee relating to the accuracy or reliability of the information.

GHG emissions reduction commitments – Antipodes NZ Ltd has developed a GHG emissions reduction plan. Some projects in this plan include:

- Reduce international air freight, through developing markets, so that orders can be pre-planned to allow time for shipping in replacement of air freight.
- Reduce staff vehicle travel through better planning of business trips.
- Reduce international air travel through increased efficiency of business trips.

Offset – 73 tonnes CO₂e from EBEX21² native forest regeneration. Serial numbers 110667 - 110739 have been cancelled from the carboNZero programme registry.

Verified by – Green Fox Consulting Ltd

Threshold of materiality – excluded emissions do not exceed 5% of the total footprint for organisation and product boundary stated.

Level of assurance – reasonable assurance

Certification status – carboNZero certified small enterprise covering all operational emissions at one site.

Certificate number – 2010096J

Valid until – 30 June 2011

Antipodes New Zealand Limited. 207 Tasman St, Newtown, Wellington 6021, New Zealand.
