

Summary of carboNZero certification: Jeremy Friend Ltd T/A NZ Artisan Honey

Jeremy Friend Limited, meets the requirements of carboNZero^{CertTM} certification having measured and committed to reducing its greenhouse gas emissions and neutralised the remaining unavoidable emissions in respect of its organisation.

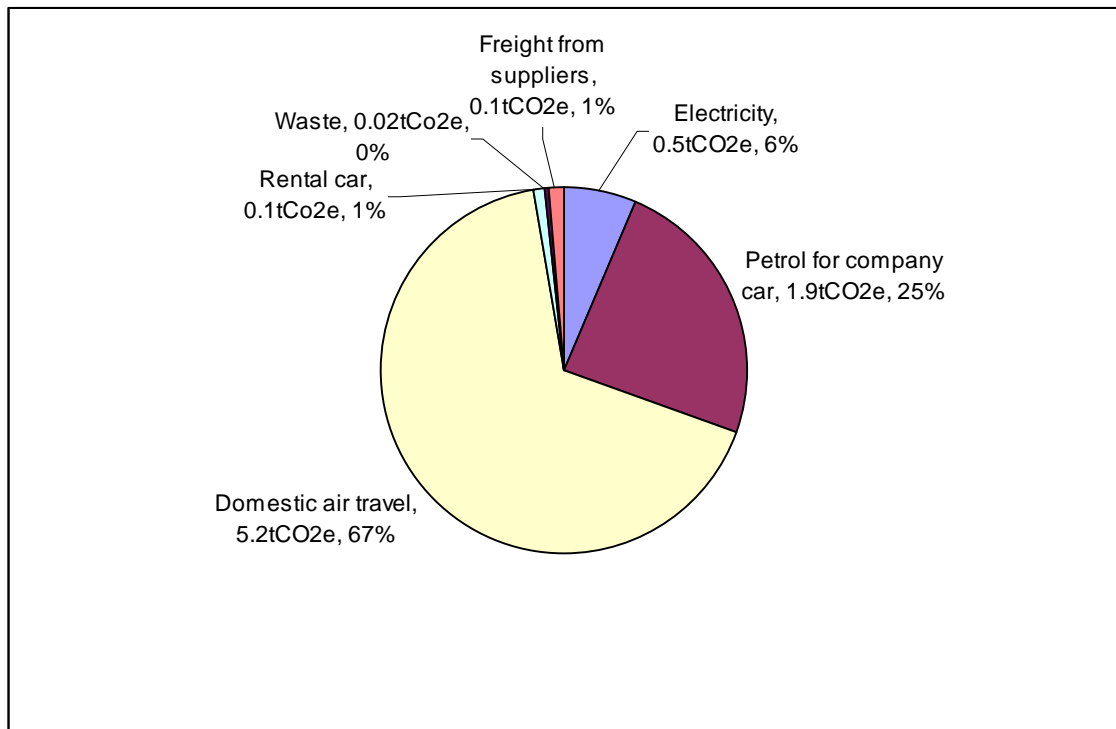

Introduction¹ – Jeremy Friend Limited trading, as New Zealand Artisan Honey, manufactures certified organic honey and markets certified organic skincare products under contract. The manufacture and supply of certified organic products are undertaken with environmental and social responsibility as integral parts of the business. Our products also carry AsureQuality organic certification.

Boundary – The boundary for the preparation of the Jeremy Friend Limited's greenhouse gas (GHG) inventory is for one site. No business units were excluded.

Consolidation approach – operational control

GHG emissions source inclusions – the diagram below shows the operational GHG emissions for Jeremy Friend Limited by emissions source. Based on 8 months data and extrapolated out to 12 months as the company has only been operating since October 2008. Total emissions for this period were 7.8 tonnes carbon dioxide equivalents (CO₂e).

¹ **Disclaimer:** This Disclosure Statement is a summary of the verified information considered for certification and the certification decision. It should not be taken to represent the full submission for certification. While every effort has been made to ensure that the information in this Disclosure Statement is accurate and complete, Landcare Research does not, to the maximum extent permitted by law, give any warranty or guarantee relating to the accuracy or reliability of the information.

GHG emissions source exclusions – No emissions source was excluded in this inventory

GHG emissions reduction commitments – Jeremy Friend Ltd T/A NZ Artisan Honey has developed a GHG emissions management plan. Some projects in this plan include:

- reduce fuel used by company cars per person – by doing so, we aim to encourage internet orders and phone contact with customers, encourage car pooling, and replace cars with efficient diesel cars.
- reduce electricity usage by reducing the overall amount of lighting in the building.
- maintaining current levels of air travel and ensure that the target is not exceeded.

Offset – 8 tonnes CO₂e VERs² from TrustPower Tararua II PRE windpower³ project. 1.2 tonnes CO₂e carbon credits were not required to offset emissions from purchased electricity because all electricity is purchased from Meridian Energy.

Verified by – Prescott Horn Ltd, Christchurch.

Level of assurance – limited assurance.

² VERs are created by eligible projects for emissions reductions achieved up to the end of 2007.

³ PRE - Projects to Reduce Emissions is a New Zealand government scheme for projects that are eligible under the Joint Implementation initiative of the Kyoto Protocol – see www.mfe.govt.nz
