

## Project Litefoot Trust

*Project Litefoot Trust meets the requirements of carbonZero<sup>Cert™</sup> certification having measured its greenhouse gas emissions in compliance with ISO 14064-1, committed to managing and reducing its emissions and neutralised the remaining unavoidable emissions in respect of the operational activities of its organisation.*

**Introduction<sup>1</sup>** – Project Litefoot is a charitable trust dedicated to raising awareness and inspiring action for a more environmentally sustainable New Zealand. In view of this, it is crucial that our organisation leads by example in measuring, managing and mitigating our own emissions.

**Boundary** – The boundary for the preparation of Project Litefoot Trust's greenhouse gas (GHG) inventory is for one site. All business activities have been included.

**Consolidation approach** – Operational control.

**Base year** – 01/04/2008 to 31/03/2009

**Measurement period** – 01/04/2009 to 31/03/2010

**GHG emissions source inclusions** – The diagram below shows the operational GHG emissions for Project Litefoot Trust by emissions source. Total emissions for this period were 7.25 tonnes carbon dioxide equivalents (tCO<sub>2</sub>e). The breakdown for the total emissions by Scope was:

Scope 1: 1.22 tCO<sub>2</sub>e;

Scope 2: 1.11 tCO<sub>2</sub>e

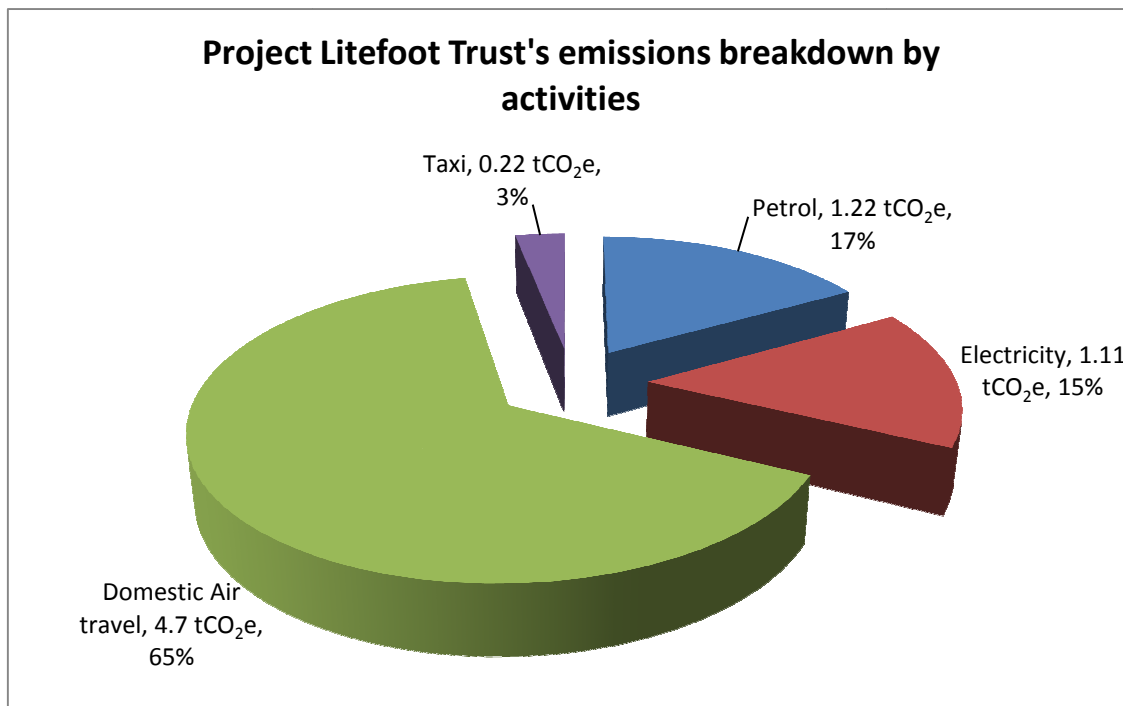

Scope 3: 4.92 tCO<sub>2</sub>e.

**GHG emissions source exclusions** – Courier activities and waste was excluded as these emissions were demonstrated to be *de minimis*.

<sup>1</sup> **Disclaimer:** This Disclosure Statement is a summary of the verified information considered for certification and the certification decision. It should not be taken to represent the full submission for certification. While every effort has been made to ensure that the information in this Disclosure Statement is accurate and complete, Landcare Research does not, to the maximum extent permitted by law, give any warranty or guarantee relating to the accuracy or reliability of the information.

## Project Litefoot Trust

**GHG emissions reduction commitments** – Project Litefoot Trust has developed the following emissions management goals:

1. Reduce ground transport emissions by 20% per km travelled. This will be achieved by changing to a vehicle with a fuel efficiency of 6 litres per 100 kilometres or less.

Project Litefoot Trust has achieved a total reduction of 5.45 tCO<sub>2</sub>e from their base year (12.7 tCO<sub>2</sub>e), which is a 43% reduction.

**Offset** – 8 tonnes CO<sub>2</sub>e. Gold Standard VERs<sup>2</sup> from Meridian Energy PRE windpower<sup>3</sup> project. Serial numbers 409835 – 409842 cancelled in the carboNZero programme register.

**Verified by** – Green Fox Consulting Ltd

**Level of assurance** – Reasonable assurance

<sup>2</sup> VERs are created by eligible projects for emissions reductions achieved up to the end of 2007.

<sup>3</sup> PRE - Projects to Reduce Emissions is a New Zealand government scheme for projects that are eligible under the Joint Implementation initiative of the Kyoto Protocol – see [www.mfe.govt.nz](http://www.mfe.govt.nz).

# Summary of carboNZero certification:

Project Litefoot Trust

**Threshold of materiality** – Excluded emissions do not exceed 5% of the total footprint for the small enterprise boundary stated.

**Certification status** – carboNZero certified small enterprise covering all operational emissions at one site.

**Certificate number** – 2010079J

**Certification valid until** – 30 June 2011
