

Summary of carboNZero certification:

Wellington Combined Taxis Limited

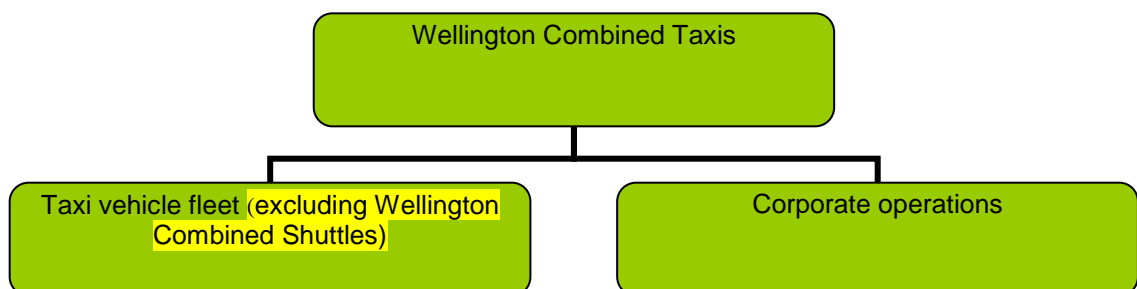

Wellington Combined Taxis Limited meets the requirements of carboNZero^{Cert™} certification having measured its greenhouse gas emissions in compliance with the requirements of ISO 14064-1 including additional life cycle emissions associated with the selected services, committed to managing and reducing its emissions and neutralised its remaining unavoidable emissions through the cancellation of an appropriate number of verified carbon credits in respect of its organisation including its taxi vehicle fleet and excluding Wellington Combined Shuttles.

Introduction¹ – Wellington Combined Taxis Limited (trading as Wellington Combined Taxis) provides taxi transport services in Wellington city. They also provide tours of the Wellington, Wairarapa, and Kapiti Coast regions. Wellington Combined Taxis Limited is a shareholder owned and operated company which was formed in 1993 with the amalgamation of the then two separately operated taxi companies - Wellington Taxis Coop Society and Black White & Grey Taxis.

Wellington Combined Taxis Limited has a commitment to sustainable business practice. This includes the introduction of hybrid vehicles to the fleet since June 2007. Wellington Combined Taxis Limited have also committed to a rule whereby no petrol only vehicles are allowed to enter the fleet after June 2008. The majority of the Company's current and future vehicles are evaluated against rigid fuel efficiency guidelines. The taxi fleet is comprised of a range of cars, vans, and shuttles.

Boundary – the diagram below shows the organisational structure used for describing Wellington Combined Taxi's greenhouse gas (GHG) emissions inventory, and what business units were included in the carboNZero certification. Wellington Combined Shuttles (Co-op Shuttles Wellington Ltd) is comprised of shuttle vans and have been excluded from this emissions inventory. These carry their own Co-op shuttles branding, and are operated via their own website and booking phone number.

For the certified service, the diagram below shows the additional GHG emissions sources associated with the life cycle of the taxi service. The green boxes indicate

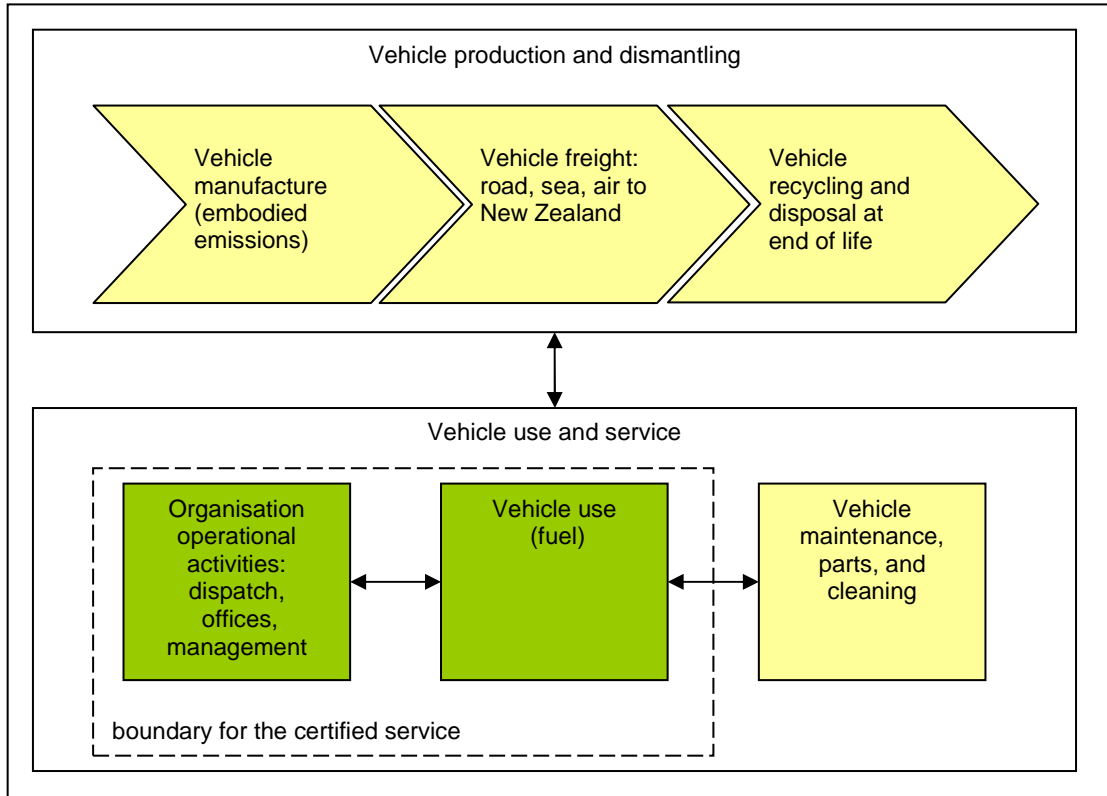

¹ **Disclaimer:** This Disclosure Statement is a summary of the verified information considered for certification and the certification decision. It should not be taken to represent the full submission for certification. activities included in the certified service, whilst the highlighted yellow area indicate the emissions sources not included in the certified service.

Consolidation approach – operational control

Base year – 1/7/2008 to 30/06/2009

Measurement period – 1/7/2009 to 30/06/2010

GHG emissions source inclusions – the diagram below shows the operational GHG emissions for Wellington Combined Taxis by emissions source. Wellington Combined Taxi's total emissions for this period were 6,621 tonnes carbon dioxide equivalents (CO₂e) comprising 6,580 tonnes CO₂e Scope 1, 19 tonnes CO₂e Scope 2 and 22 tonnes CO₂e Scope 3 emissions.

Summary of carboNZero certification:

Wellington Combined Taxis Limited

GHG emissions source exclusions – the following emissions sources were excluded as the amount of emissions associated with these was considered to be insignificant in proportion to the total direct GHG emissions profile, and/or there was insufficient data available to perform emissions calculations:

- Electricity for offsite/contracted vehicle grooming
- Vehicle maintenance services
- Office waste to landfill
- Business accommodation
- Electricity from sub-leased buildings

GHG emissions reduction commitments – Wellington Combined Taxis Limited has developed a GHG emissions reduction plan. Some projects in this plan include:

- Undertaking a vehicle fleet check through the Energy Efficiency and Conservation Authority
- Maintaining a vehicle requirement rule to ensure low emissions intensity vehicles are entering the fleet.
- Providing fuel efficient driving practices information and/or training for all drivers

GHG emissions reduction report against last year's plan – Wellington Combined Taxis has achieved reductions in the taxi vehicle fleet of approximately 7% per km travelled. The intention is to further reduce these emissions as the new vehicle requirements continue to enable integration of more fuel efficient vehicles into the taxi fleet.

Summary of carboNZero certification:

Wellington Combined Taxis Limited

Offset – 6,602 tonnes CO₂e. PRE² landfill gas and windpower projects. Serial numbers 207883-208882 and 600001-695692 Brazil hydropower upgrading project have been cancelled on carboNZero registry. Carbon credits were not required to offset emissions from purchased electricity because all electricity is purchased from Meridian Energy.

Verified by – AsureQuality Ltd

Threshold of materiality – excluded emissions do not exceed 5% of the total footprint for organisation and product boundary stated.

Level of assurance – reasonable assurance for organisation and limited for service

Certification status – carboNZero certified “organisation” and “service”

Certificate number – 2010098J

Valid until – 31 October 2013

Wellington Combined Taxis Limited, 150 Adelaide Road, Newtown 6023, Wellington, New Zealand.
